Cabin Interior Solutions

Boeing provides interior modifications that deliver the Boeing Edge, an advantage that results from the industry's largest portfolio of services, support and solutions, helping you get the most out of your asset today and tomorrow. Boeing fleet enhancements help your fleet retain maximum value when you refresh your airplane's interior, in-flight entertainment and connectivity system.

Making the best impression

Every aspect of the cabin interior reflects your brand image. At Boeing, we deliver high-quality, aesthetically pleasing, innovative products and services and a broad range of interior modernization solutions with full service integration to help you create the comfort and atmosphere your customers expect. And every detail counts.

Solutions for the 747-400, 767-200 and 767-300

To keep your fleet modern and comfortable, Boeing has developed distinctive interior enhancement products to give new life to your 747-400 and 767-200/-300 airplanes. These interior packages are designed with your goals in mind and to deliver a cabin environment that drives passenger loyalty.

Modifications

Achieve Great Styling and Comfort with Simplicity and Ease.

The 767 Enhanced Interior Solution

The foundation of a new retrofit 767-200/-300 Enhanced Interior is a package of easily installed features that transforms your interior from its original design to a new, enhanced look and feel. New style ceiling panels, outboard shelf bin doors, transition panels, centerline bin doors, and bucket assemblies comprise the 767 Enhanced Interior package and offer you the flexibility to choose your own upgraded interior solution. The 767 Enhanced Interior

package is designed to accommodate your needs and requirements to improve cabin architecture and minimize scheduled airplane downtime. And installation of the new 767 Enhanced Interior package requires minimal modification of the environmental control systems, ducting or main cabin ceiling lighting and wiring.

767 Enhanced Interior

The 747 Enhanced Interior Solution

The 747-400 offers great opportunities for interior enhancements for both the main cabin and the upper deck. For the 747-400 main cabin, you can achieve new architectural styling with the Boeing 747 Enhanced Interior package. Center and outboard stow bins are blended with the ceiling for softer, smoother, contoured surfaces that reduce shadowing and create a sense of spaciousness—the foundation of a new and modern interior. For the upper deck, we apply the same sleek styling as we did for the main deck and

add enhanced overhead bins and floor-mounted stowage boxes that together can accommodate twelve to fourteen more 14- by 9- by 22-inch bags, providing more storage and more comfort for your passengers. Installation of the new 747 Enhanced Interior package requires minimal modification to existing overhead linings, support structure and airplane systems.

Enhancements that Give your Business the Edge

Decorative elements let you customize your new interior

To create an unforgettable passenger experience, you can choose to customize your interior with decorative replacement panels and laminates. Replacement panels give a new, modern look to the cabin that complements the elements of your new interior.

Keeping passengers entertained and connected

Passengers demand more from their in-flight time and we provide you the ability to keep your passengers connected and entertained. Integrating in-flight entertainment systems, connectivity solutions and cabin services management systems is a complicated business. And as the designer and manufacturer of your airplane, integrating these complex systems is our specialty.

Making complex systems work

No one knows your passengers better than you. You choose the interior experience and we make it happen. And no one knows Boeing planes better than Boeing. Our engineers have the experience, knowledge, skills, and access to proprietary OEM design data to successfully integrate the most complex systems.

The Boeing Edge benefits your business

The Boeing Edge is organized around your business to give you the advantages it takes to succeed. It's designed to optimize the performance of your airplanes and operations, backed by the knowledge and experience that only Boeing can provide. And when Boeing modifies your airplane's interior, you can feel confident because you're flying with the Boeing Edge.
