Maintenance Performance Toolbox

Toolbox Mobile Library

Toolbox Mobile Library is part of Boeing's suite of mobile maintenance applications, designed to improve efficiency for maintenance technicians. This mobile application hosts Boeing and airline documents from the Library module of Maintenance Performance Toolbox. With Toolbox Mobile Library, technicians now have access to maintenance documents for instant reference and use, wherever and whenever they are needed.
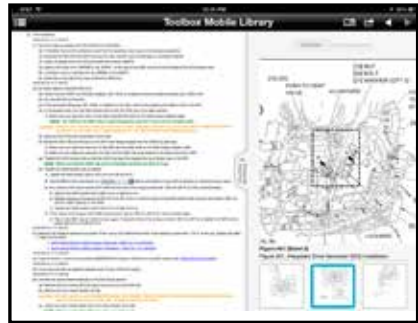

Maintenance documents accessible at all times, wherever you are.

With Toolbox Mobile Library, you can:

- Get to your documents with or without network connectivity

- Receive data updates directly to a mobile device

- Have access to Boeing maintenance documents: Aircraft Maintenance Manual, Fault Isolation Manual, Structural Repair Manual, Wiring Diagram and Schematics Manual, which includes operator-customized content added through the Authoring module in Maintenance Performance Toolbox

- Link between manuals and easily search documents, parts and fault information

Key notes:

Requires subscription to Library module of Maintenance Performance Toolbox

Key benefits:

- Reduced airplane turn times with instant access to maintenance documents

- Supports document compliance at the point of need – the airplane

- Improved labor efficiency

- Seamless integration with Boeing's suite of mobile maintenance applications
